

## Magnifier Attachment

A1830M MAG3XACE A1310G

- 1 Remove the magnifier attachment from the packaging.
- 2 Unscrew the wing nut (C) from the screw (B) by turning counter-clockwise and remove from the clip (A).
- 3 Decide at what height you would like the Magnifier Attachment to be placed. Attach the clip (A) to the metal round shaft at the desired height. (Do not allow the clip to rest on the flexible tubing above the metal shaft; make sure the clip rests fully on the metal shaft.)
- 4 To secure the Magnifier Attachment to the lamp, put the screw (B) through the hole on the clip (A). Place the wing nut (C) on the tip of the screw and turn the wing nut clockwise to tighten.

**CAUTION:** Risk of fire! Never place the Magnifier Attachment under direct sunlight.
